Active U.S. DoD Secret Clearance

Education

Middle Tennessee State University

Bachelor of Science in Computer Science, Cybersecurity Systems

Murfreesboro, TN

Expected Graduation: May 2027

Relevant Coursework

- Data Structures & Algorithms
- Database Systems
- Software Engineering
- Computer Systems
- Engineering Fundamentals
- Computer Networks

Experience

Tennessee Army National Guard

Infantry Sergeant

Aug 2020 – Present

Morrison, TN

- Led and mentored a 4–8 soldier team using structured mission planning and clear task delegation, resulting in consistent mission readiness and accountability in high-pressure environments.
- Deployed to the Middle East in support of operations requiring strict adherence to security protocols, strengthening operational discipline and threat awareness.
- Conducted mission planning and execution using risk assessment frameworks and real-time decision-making, enabling safe and effective operations under uncertainty.

Parthenon Grille

Restaurant Manager

Oct 2022 – Apr 2024

Murfreesboro, TN

- Supervised and trained staff using clear communication and performance feedback, resulting in improved team reliability and customer satisfaction.
- Built and maintained Excel spreadsheets using formulas and structured data organization, enabling basic trend analysis and reporting to track labor hours and daily sales.
- Coordinated front- and back-of-house teams through clear communication, minimizing service delays during peak hours.

Projects

Healthcare Database Management System | *Python, Flask, MySQL, JavaScript*

September 2026 – Present

- Designing a full-stack healthcare management system for dispatchers and doctors to manage patient, vehicle, emergency, and hospital information.
- Designed a system architecture connecting an HTML/CSS/JavaScript user interface to a Python Flask backend and MySQL database.
- Planning a live map dashboard using Leaflet and Firebase to support real-time emergency and vehicle information.

Math Blaster | *Godot, GDScript*

September 2026 – Present

- Collaborating with a team to develop a desktop educational game inspired by the 1990s Math Blaster series.
- Designing a minimum viable product that combines interactive gameplay with math-based challenges and progression.
- Developing core game components through iterative design, testing, and team collaboration.

AI Agent Job Applier | *Python, LLMs, Browser Automation*

March 2026

- Built an AI agent to automate job applications by navigating websites, completing forms, and interacting with web elements.
- Integrated open-source LLMs (Ollama/Bytez) to interpret job listings and generate tailored application responses.
- Used Browser-Use to automate multi-step browser workflows and create a fully automated job application process.

Technical Skills

Programming Languages: Python, C/C++, JavaScript, SQL, Bash

Frameworks & Technologies: HTML/CSS, Flask, MySQL, LLMs, Browser Automation

Tools & Platforms: Git, Linux, VS Code, Godot, Ollama, Browser-Use, JupyterHub, RStudio

Certifications & Training

Counter-Radio Controlled Improvised Explosive Device/Electronic Warfare

US Army

March 2025

Camp Buehring, Kuwait

- Operated and monitored CREW systems using established electronic warfare procedures, reducing risk from radio-controlled threats during operations.
- Executed system setup, checks, and troubleshooting following technical and safety protocols, ensuring reliable equipment performance.
- Applied electromagnetic spectrum awareness to identify and mitigate potential remote-triggered device threats, improving force protection.
